SCIENTISTS CHANGE LEAD INTO MERCURY

Claim Success in Transmution of Elements.

New York. - The Scientific American publishes with its indorrement a report claiming the successful transmution 6. elements.

Drs. A. Smits and A. Krassen of the University of Amsterdam have Emma Van Den Kerckhoven, Sec. succeeded, the periodical says, in

Emphasis is placed upon the minute care taken to obtain the purest form of lead, in order that no suggestion might be made of the presence of the transmuted metals as an alloy or im-"The success of such experiments,"

sny Orson D. Munn, editor of the Scientific American, "delights every physicist who is interested in the new science of atomic physics. Many scientists have been seeking to demonstrate that the only difference between the different elements lies in electrons in their atoms. Transmutation is the best kind of evidence in support of the theory.

"There is no present intrinsic value in the achievement, but it opens up for the distant future possibilities we dare not even try to predict."

The Amsterdam experiments were made with a quartz mercury vapor Bartlett, Q. M. lamp, similar to the one used by other scientists in their attempts to in Odd Pellows' Hall the second and convert mercury into gold, the report fourth Thursday evenings of each

Two Series of Experiments.

Doctors Smits and Krassen describe two series of experiments-the first of which, owing to certain complications, were indecisive, "but the second series resulted in the transmutation of the element lead into mercury and thalltom."

"Since in our experiments we were into mercury," they added, "it was necessary from the first to avoid a mercury air pump and a mercury manameter. Therefore the lamp employed was evacuated by a carefully cleaned metallic pump with two 'V' tubes placed in liquid nir. and finally by a large vessel filled with coconut carbon. It was also cooled in liquid air, a method by which a high vacuum could be obtained."

Details of Experiment. The procedure by which mercury

was obtained follows: The quartz lamp was filled with lead; the lead then was heated in a high vacuum until it was red hot.

The lead oxels coating being completely dissociated, the surface of the louid lead became as brilliaut as mercury. The lamp was left to burn in vacuum. The lamp was also oscil

lated so as to make and break the parrent, thus increasing its intensity. After ten hours, the strongest charac teristic lines of mercary and also that flum appeared on a spectrograph. Again and again the process was repeated and each time with the same MIRCORA, In later runs, along the whole lead

pectrum, the mercury lines were dominant, Doctors Smith and Krassen leclared, adding: "The striking result just given

cems to justify the expectation that if the lamp had a long enough duration of life, the point could be reached where the lend spectrum would have disappeared completely."

1803 Tennessee "Blue

Law" Perils Sunday Gas Nashville, Tenn. Sunday "blue laws" more than 100 years old may be invoked in Tennessee to prevent operation of Sunday business. This is seen by keen observers in

the decision of the Supreme court recently in ruling that a person operating a gosoline filling station "is a merchant," and liable under the old athibite, The law invoked was possed by the

state legislature in 1800. Violation carries a five of \$3 for each offense. one built of which goes to the state and the after half to the person making the complaint, The old statute was revived by the

Sopreme rourt in making a decision in the case of a filling station operafor who equalit on folimition to restrain a constable from interfering with him in the speration of his hast. ness. The rematchle had arrested the filling stothen squeator to times. The petition for the infanction was denied in Chancers court and the lower court stranced also appealed to the Sp THE COURT

me I knew some one was behind me. Picking up the quill I dipped it in SYNOPSIS.—Traveling by cance on the Mississippi, on his way to Biloxi, in the early days of the settlement of Louisiana. William Brampton, English spy, known to Indians and settlers as the "White Indian," sees a Natchez Indian post a declaration of war against the French. For his own purposes, he hastens to Biloxi to carry the news to Bienville.

lak and began writing: "To his excellency, Monsteur Philippe de Vaudreuil, Governor of

"Monsleur: I find myself most unjustly accused of serving the interest of the English colonies to the hurt of nerves ceased jumping as I felt him France. You, your excellency, who have been so well acquainted with my netivities, and who, I flatter myself, have always given me favorable consideration in estimating-"

"That paper, if you please, Monsleur Brampton," rang out the cold voice of

With assumed surprise I wheeled about. The muzzle of a filntlock pistol of large bore was resting on the sill of the windaw, and behind it was the stern, implacable and suspicious countenance of the governor. As I twisted to face the window my body masked the table. My hand gathered up the message to the young woman and, as I brought up my foot, shoved it inside

"Why-why, your excellency! This is intolerable. You aim weapons at me! I protest ..."

"Enough, Monsleur Brampton!" sharply interrupted the governor. "Where his gracious majesty's affairs are involved I cannot stand on the punctilles of courtesy. Both hands where I can see them. Sergeant, bring me what he has been writing." "I have it, your excellency; all that

he has written," said the sergeant. The platol vanished, and Blenville entered the small office and without a glance at me took the sheet of paper

As I sat there with the message before | may be my good fortune to have you command me.'

And I extended my hand and gave him a warm English handelasp. I felt his hand jerk as the wad of paper pressed into the palm. Undoubtedly the fellow was mad, and yet on subjects apart from the Mississippi country he could be some enough. My palming the paper.

"It has been good to meet you, monsleur," he somewhat stiffly returned. "Till we meet again at my plantation. I shall go in much for allkworms, using the Indian girls and children for the delicate task of caring for the worms,"

And with one of his exaggerated borrs, he was backing toward the sullen pirate and the impatient boatman. Sieur de Bienville was charming. He referred in no way to my dublous position, and he extended to me those little attentions that are so natural in his race, and which, I am forced to belleve, must spring from an lunate kindness of heart. Only once was my personal standing involved in our table talk, and that when I ventured to ask: "Is there any objection to my visiting Mobile while waiting for Damoun's

"He patient a bit, and perhaps we can go there together." (Meaning, of course if Damoan gave me a clean

His manner discouraged further requests, and as if to avoid a recurrence of the subject he entered on a lively discourse upon the English and the French manner of accupying a country. "The priest was the first of the French to visit abortines and the trader was first of my poster, he said This feel time into a rem praise of the lesults, whom he greatly admired, at though he readily willled ther perer exercised the same influence mer the lower tiver Indians as they did over the Canadian.

the sergeant glaring at us. I must have a bout to take me to Pontchartrain. It was necessary that escape under cover of night, leaving Bienville to believe I was making for Pensacola. I had informed mademolselle that I would call for her, or send for her; and I intended to keep my word. Aside from this there were the Choctaws, whom Blenville would set on my trail if it was not believed I had departed in a boat.

I stuck close to the shore, sprawling on the sand, with Suarez or one of his men always in the middle distance, keeping watch. Toward sunset Blenville came hurrying down to the boats and accosted me, saying:

"Monsleur Brampton, I'm off for the lsland. Another ship come in. It's a h-1 of a case! A sick woman hereand she may have the plague-and no place to keep this new lot either here or out there. I go to see they are kept on the ship until I can arrange for

He paused, and I knew what he would say next, and I rubbed my head and stomach and grouned slightly. "Touched by the sun? Are you Ill?" he asked, not unkindly.

"Only a queer dizziness. Something of a pa'a in my vitals," I answered, making a face as some imaginary twings of pala shot through me.

He bit his tip and hesitated, his perplexed. Illa intention of compelling my company was being replaced by another safeguard. He expressed his regret, turned toward Suarez and beckoned him to approach, at the same time walking to meet him. He spoke briefly to the sergeant, then hustened down to the shore and went nivard a salling rescel

Suarez walked to me and with a smick sold:

"Ills excellency's compliments to Monster Brampton, who is Indisposed. Monsieur is advised to go to his excolleney's quarters, take a stiff drink of brandy and lie down."

I rose and with unsteady steps walked with him toward the fort. As alant. seriwed up in an expression of pain. His aplamb deserted him and he walked farther upars from mr. He had no desire to eateh the fover, and the moment I entered the living-room of the governor's house be burrielly left me. I natched him give orders to two sublines, who has the gate and time the funitions o'mer to the busine They were returned to do this as they that been enjoying the badin see of the nother Sax I was confident and under guard. # HOW TO KEEP WELL

DR. FREDERICK R. GREEN

Editor of "HEALTH" 

162 1926, Western Newspaper Union.) IS COFFEE HARMFUL?

COFFEE is the morning drink of the great majority of American famillies. It is probably the noon and evening drink as well in most households. As all the conce used in this country is imported, it is an easy matter to determine whether its use is increasing or not. On this question there is no doubt. Coffee drinking in the United States is steadily increasing.

While enormous quantities of tea are also used, ten has never been as popular in this country as coffee, nor as generally used here as it is in England,

Why do you not want a cup of hot coffee with your breakfast? For two reasons. The first is that most people like a hot drink with their meals. The second is that most coffee drinkers get a marked effect from the cutfeine, which is the essential alkaloid In coffee. This drug stimulates the heart and raises the blood pressure. It puts a kick in you and sends you off to your day's work, ready to meet its trials and responsibilities.

Perhaps you are one of those who say, "Coffee doesn't affect me at all. I can drink it or let it alone and never know the difference." All right. But lust leave off your usual cup of coffee tomorrow morning at breakfast. Alestr nine or tele o'clock in the morning you will suddenly realize that you have a dull hendache. You feel languld and studid Your mind fan't working as clearly as usual. Your brain is rying to work without its usual stim-

we advanced the fellow took more Lables just as are alcohol, tobacco in a word, coffee and ten are drug morphice and envalue, three accustom the look to a regular dose of any of these dougs and the body demands It. Are these habit forming drugs harmful? There has been much discussion on this subject, much of it bitter and implicated. The attitude of most of to is that our drug habit is harmless but our neighbor's drug habit is bad I know on excellent lasty who is the listelly engineered for technicies front frakers reming somethe talks one this authorit. # **OUR HOMES**

Train up a child in the way he should go; and when he is old he will not depart from it.

Proverbs 22.6.

The future of this country depends upon the home life of our children. The principles which are inculcated in the child today will determine the length of time this aution survives and the position it will occupy among the nations of the world. The idea of right and wrong which our children are receiving from their fathers and mothers today will largely make up their rules of conduct and processes of thinking when they take up the relux of business and social life as we give

The influence which we are exerting consciously or unconsciously will go on from generation to generation. The responsibility is ours and it cannot be side stopped. We are all parents or we are examples to children. Are we doing our full share to set before the coming generations the principles which stand for progress and life? In the home rests the future of this nation and the other nations of the

Here are a few recipes that other

folks like, and they may appeal to you. Bon-Ton Omelet.-Bent the yolks and whites of tour eggs separately. Mix one-fourth of a tenspoonful of cornstarch with one-half cupful of milk, then add to the yolks and fold in the

beaten whites, add salt and pepper to taste and pour into a hot, smooth frying pan in which a inblespoonful of butter has been melted, and cook slowly, loosening the edges with a knife occasionally until done. Stash the opposite side and fold over on to a hot platter. Serve at once. If the top of the omelet does not seem to be well cooked, set in a hot oven for a few

minutes before folding. Quick Tea Cakes.-Cream two tablespoonfuls of butter with one cupful of sugar, add two-thirds of a cupful of sour cream, one-fourth tenspoonful of soda, two beaten eggs, one tenspoonful of vanilla, and one and onehalf cupfuls of flour sifted with one tenspoonful of baking powder. Beat well; add a few raisins or one on top of each; bake in gem pans or frons and serve warm.

Prune and Date Jam, Cook one pound of prunes until soft in a small amount of water. Remove the stones and add one pound of stoned chopped dates which have been cooked in a small amount of water. Add the Julea of half a lemon with half a cupful of honey. Cook the mixture until thick Prune Cake,-Mix together and holl five minutes, the following: Two cupfuls each of brown sugar and boiling water, three cupfuls of souked pitted pranes, stoned and chapped, one reaspoonful each of salt and cinnamon, one-half teaspoonful each of cleves and nutmeg. Dissolve a teaspoonful of soda in two tablespoonfuls of warm water, and add four tablespoonfuls of fat. Sift two copfuls of flour with two teaspountals of baking powder and add the first mixture with a cupful of chopped nut ments. Bake in a tube cake pan for one hour.

Oyster Soup Supreme Take une tablespoonfuls of flour, two of batter. two thirds of a cupial of minced is said that for spring galetin time with mes, time cettern popular or gabordine. Usin cream, soit and pepper to season, shated, gray, rose, peach, title, goldeling on just long chough to carl the ava-Many of the turns coats are made and foreider blue, there color and ters, and heat the chicken Sprinkle op with tember of raid calared from the new wild honey shade.
